

Annex

Request

1, *Between Jan 2017 and Jan 2019, the number of consignments of poultry originating in **Brazil** that were microbiologically tested (or otherwise checked) at UK borders and found to contain **salmonella***. (Please indicate which port or airport the consignments were received.)*

2, *In each above case, details of the type of product involved, eg chicken breasts or frozen portions, the weight of the consignment and the dates the consignments were received.*

3, *Details of the number of these contaminated consignments that were subsequently re-exported to Brazil, along with details of the products involved (eg product type, weight) and the date the consignments were re-exported, and the locations (port/airport) where consignments were dispatched from.*

** If held, please detail the strain of salmonella detected*

4, *For any contaminated products that were not re-exported, please detail what happened to the consignment, eg destroyed or heat treated*

Note: If the above exceeds the permitted time allowance, please supply data that is possible, beginning with Jan 2017 and working forwards

Response

With regard to the above request, please see below attached information as requested.

Please note:

- The FSA does not hold information on the exact arrival date of consignments. We have therefore provided an estimated arrival date.
- The FSA holds no information on the date when consignments were re-exported. We have therefore provided the date by which the consignment needed to be re-exported.
- Information on both the type of product re-exported and the port the consignments were dispatched from, is not held by the FSA. This type of information may be held by the Port Health Authority.

Month	Hazard	Product	Gross Weight of consignments (kg)	Estimated Arrival at Port	Actions taken	Port consignments received	Consignments re-exported?	Date to be re-exported by	Type of Product re-exported and Weight	Port involved in re-location of consignments	Consignments not re-exported (actions taken?)
